

## **Santa Barbara Shootout Rain Plan**

In the event that rain during the week or a forecast for heavy storms before the Shootout closes grass fields then the following rain plan will be put into effect.

### **General Rain Plan:**

1. All games in Santa Barbara restricted / rescheduled to the three available turf facilities, two turf fields at UCSB and one turf field at SBCC.
2. Approximately half the games played on the three turf fields in Santa Barbara.

### **Scheduling Considerations:**

1. It is unlikely all originally scheduled match-ups will be played.
2. All game schedules reduced to three games, if necessary. (Minimum game length requirements more of a priority than number of games).

### **WWLL Scheduling Requirements:**

1. If a WWLL inter-region game is affected it could leave a WWLL team short on scheduling requirements for games against teams from another region.
2. If this happens then teams may choose between rescheduling the game to a regular season date or appealing to the WWLL Commissioner for a waiver releasing the team(s) from the requirement for the season.
3. An attempt at rescheduling the game to satisfy the requirement must be documented and it must be shown that no solution could be found.
